Responsive Web Design

Ivonne Jacome

What is Responsive Web Design?

Responsive web design is all about using HTML and CSS to automatically resize, hide, shrink or expand a website to make it look good on all devices: desktops tablets phones Phone **Tablet** Desktop

SETTING THE VIEWPORT

To create a responsive website, add the following <meta> tag to all your web pages:

EXAMPLE:

<meta name="viewport" content="width=device-width, initial-scale=1.0">

This will set the viewport of your page, which will give the browser instructions on how to control the page's dimensions and scaling.

EXAMPLE:

Without the viewport meta tag:

●●●○○ N Telenor 🕏

12.29

Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue duis dolore te feugait nulla facilisi. Nam liber tempor cum soluta nobis eleifend ontion conque nihil imperdiet doming.

With the viewport meta tag:

RESPONSIVE IMAGES

Responsive images are images that scale nicely to fit any browser size.

USING THE MAX-WIDTH PROPERTY

If the max-width property is set to 100%, the image will scale down if it has to, but never scale up to be larger than its original size:

Sintaxis:
